List of figures	6
List of tables	9
Prologue	10
1. Introduction	13
1.1. Sacred places as a part of Sámi beliefs	16
1.2. Research history: from reminiscence to DNA analysis	24
1.3. Positioning or who is allowed to tell stories of the past	30
1.4. Is there an area forbidden to researchers?	34
1.5. Summary	35
2. The research material from under rocks and atop fells	36
2.1. Outlining the material	37
2.2. The classification of sacred places	41
2.3. Criteria for determining the reliability of the material	46
2.4. Archaeological research in sacred places: chronology and finds	51
2.5. Summary	58
3. The sacred in the landscape	59
3.1. The landscape as experienced and lived-in	60
3.1.1 The taskscape	61
3.1.2. The landscape of story and memory	62
3.2. Viewpoints into sacredness	65
3.3. GIS as a way of describing of the landscape	68
3.4. Summary	70
4. Sacred places in relation to the landscape	71
4.1. Sacred places as elements of the landscape	72
4.1.1. Anthropomorphism and zoomorphism as characteristics of sieidis	86
4.2. Visibility in the landscape	89
4.2.1. The three zones of the viewshed	90
4.2.2. Vision compared to other senses	92
4.2.3. Sacred places as visible elements	94
4.3. The connection of sacred places to water	105
4.3.1. Liminality as a determining factor for sieidis	108
4.4. Water as part of the soundscape	112
4.5. Summary	120

5. Activity in the ritual landscape: tales told by archaeological sites	121
5.1. Fishing and hunting as part of the ritual landscape	122
5.2. The connection between sacred places and archaeological remains related to hunting	127
5.3. Settlements near sacred places	133
5.4. Reindeer husbandry as part of the ritual landscape	140
5.5. Other ritual activities in the landscape	146
5.6. Churches on ethnic sacred land	150
5.7. Summary	157
6. Sacred places today	159
6.1. Signs of the modern use of sacred places	160
6.2. Neo-paganism as a part of the activity at the sieidis	166
6.3. Tourism focusing on sacred sites	168
6.4. Sacred places in local stories	173
6.5. Summary	174
7. Actors and the bodily experience in sacred places	175
7.1. Action as a part of ritual	176
7.2. Different actors in the sphere of ethnic religion	177
7.3. Animals as objects of action and actors	179
7.4. The use of space as a part of offering activities	183
7.5. Offering activities as a part of the landscape of memory	188
7.6. Summary	192
8. The sieidi life cycle from past to present	193
8.1. The birth of a sacred place: what turns a stone into a sieidi	194
8.2. The use of a sacred place: rituals and subsistence	197
8.3. The reuse of sacred places: changing meanings	199
8.4. The end of use: are they alive after all?	203
9. Summary	206
Bibliography	210
Appendix I. Sacred places in Finnish Lapland	230
Appendix II. Sieidis excavated during the writing of this thesis	286
Appendix III. Bone material dated during the project	294

List of figures

Unless otherwise stated, all photographs are by Tiina Äikäs.

- Figure 1.** Map showing the locations of sacred places (black dots) in relation to the area (Sápmi) traditionally inhabited by the Sámi.
- Figure 2.** Chart of the categorization of sacred places.
- Figure 3.** Map of the sources describing sacred places in Finland by municipality. A darker colour represents a larger number of sources.
- Figure 4.** Map showing the locations of surveyed sacred places.
- Figure 5.** The sacred places in the register of the National Board of Antiquities (NBA) and the database (DB). The sites in the database are associated with written or oral traditions.
- Figure 6.** The distribution of sacred places according to type in a semantic order. Each place may belong only to a single type in the chart. (On the principles used to determine reliability values, which are presented by means of colour, see Chapter 2.3.)
- Figure 7.** A carved wooden pole on top of Kussuolinkivaara (in the photograph: Kati Sarajärvi).
- Figure 8.** A *keripää*, or a knobbed pole made to commemorate a successful fishing trip, at Sorsaniemi in Lake Kemijärvi.
- Figure 9.** Map showing the reliability values of sacred places.
- Figure 10.** Test excavations at Sieiddesaiva in Enontekiö in 1937 (SUK 434:22).
- Figure 11.** A reindeer antler artefact (length 13.1 cm) from Sieiddesaiva. (SU 1346, photograph by Risto Hakomäki).
- Figure 12.** Test excavations at Seitaniemi in Lake Orajärvi, Sodankylä, in 1957 (National Board of Antiquities / The Archive of the Department of Archaeology, Picture Collections).
- Figure 13.** Map of the sieidis studied by means of excavation before and during the project.
- Figure 14.** A bone ring (KM 37853:1) from Taatsi in Kittilä and an antler button (KM 37851:3) from Näkkälä in Enontekiö (photograph by Eeva Miettinen).
- Figure 15.** Features representing the topography of a sacred place. In four cases, the site is shared by two groups.
- Figure 16.** Ladjokeädgi by the River Tenojoki.
- Figure 17.** Seitigädgi in the shallows of the River Utsjoki.
- Figure 18.** The Lake Ketojärvi sieidi stone in Enontekiö, located in the shallow water close to the lakeshore.
- Figure 19.** The Lake Äkäsjärvi sieidi stands on a high bank. The lake, located slightly further away, dominates the landscape.
- Figure 20.** Uhriharju in Pelkosenniemi; an example of a sacred place characterized by a mound-like landscape feature.
- Figure 21.** Kirkkopahta in Muonio is located in a forest landscape (in the photograph: Anna-Kaisa Salmi and Rosa Vilkama).
- Figure 22.** Rytiniemi in Lake Särkijärvi, Kittilä, is an example of a small headland on which a sieidi once stood (in the photograph: Rosa Vilkama).
- Figure 23.** Porviniemi, a 370-metre-long headland with a sieidi in its south-eastern part, is located in Lake Pallasjärvi, Muonio.
- Figure 24.** Sitakallio in Lake Iijärvi, Inari, is an example of an offering place on a treeless islet (photograph by Anssi Malinen).
- Figure 25.** Moossinasaari in Lake Inarijärvi is an example of a large island that has been used for offering activities, but the location of the offering place is not precisely known (photograph by Anssi Malinen).
- Figure 26.** A sieidi stone on the slope of Dierpmesvárri (photograph by Anna-Kaisa Salmi).
- Figure 27.** The Saitavaara sieidi on the top of the hill.
- Figure 28.** A distribution map of the landscape features related to sacred places.
- Figure 29.** A comparison of the features representing the topography of sacred places between Utsjoki and Inari. In four cases, the place belongs to two groups.
- Figure 30.** The landscape features of sacred places used by individuals and communities as percentages of the total amount of features. In the private category, one sieidi is shared by two groups.
- Figure 31.** Landscape features according to the feminine and masculine deities associated with sacred places.
- Figure 32.** Viewed from the shore, Ladjokeädgi resembles a chair or a salt cellar.
- Figure 33.** The sieidi at Koskikaltiojoen suu [The mouth of the River Koskikaltiojoki] is a so-called *rauk* (in the photograph: Eeva Miettinen).

- Figure 34.** Cups formed in the cavernous hollow in Sieiddakeädgi (photograph by Anna-Kaisa Salmi).
- Figure 35.** Belt-like bulges on Seitigädgi in Utsjoki.
- Figure 36.** A white stone on the shore of Lake Seitalommol, interpreted as a sieidi, stands out because of its colour.
- Figure 37.** In this photograph taken by Samuli Paulaharju in 1920, the human figure in the Taatsi sieidi is easy to distinguish. Later, the stone was partly destroyed (National Board of Antiquities/3490:2567).
- Figure 38.** The Lake Säytjärvi sieidi, said to resemble the nose of a fish.
- Figure 39.** Porviniemi seen from Palkaskero.
- Figure 40.** The Porviniemi sieidi behind the birch trees on the shore (in the photograph: Siiri Tolonen, Sarianna Kivimäki, Anna-Kaisa Salmi, Rosa Vilkkama, and Lasse Märsy).
- Figure 41.** The Näkkälä sieidi in August, when foliage still partly reduces visibility (photograph by Anssi Malinen).
- Figure 42.** The same sieidi in September, after the leaves have fallen (photograph by Jari Ylönen).
- Figure 43.** The Lake Äkäsjärvi sieidi stone covered by snow (photograph by Anssi Malinen).
- Figure 44.** The size of the restricted viewshed zone of sacred places in hectares. A viewshed where all cells are visible would be 28.3 ha.
- Figure 45.** The size of the intermediate viewshed zone of sacred places in hectares. A viewshed where all cells are visible would be 2827.4 ha.
- Figure 46.** The zones of restricted viewshed (light orange) and intermediate viewshed (dark orange) for the sacred place in Ajakkajärvi, Posio. Basic map sheet © National Land Survey of Finland, licence no. 051/MML/11.
- Figure 47.** The result of the viewshed analysis for Sieiddakeädgi diverges from field observations, in which the visibility of the sieidi from the north was accentuated. The figure shows the restricted viewshed zone in light orange and the intermediate viewshed zone in dark orange. Basic map sheet © National Land Survey of Finland, licence no. 051/MML/11.
- Figure 48.** The restricted viewshed zone of the Ladjokeädgi sieidi consists mainly of water areas. Basic map sheet © National Land Survey of Finland, licence no. 051/MML/11.
- Figure 49.** The proportion of water in the restricted viewshed zone of a sacred place.
- Figure 50.** Ukonsaari in Inari is an example of a sacred place considered as dominating the landscape. The figure shows a view both from the top of Ukonsaari, Inari (yellow), and from the site of the find concentration (restricted viewshed zone in light green, intermediate viewshed zone in dark green). Basic map sheet © National Land Survey of Finland, licence no. 051/MML/11.
- Figure 51.** The well-known profile of the island of Ukonsaari in Lake Inarijärvi seen from the west-southwest.
- Figure 52.** Seen from the north, the shape of Ukonsaari is not as conspicuous.
- Figure 53.** The restricted viewshed zone (orange) of the Ukko sieidi stone in Ukonjärvi does not reach outside the island. Basic map sheet © National Land Survey of Finland, licence no. 051/MML/11.
- Figure 54.** The locations of sacred places (including sieidis) and sieidis in relation to water as percentages of all sites.
- Figure 55.** Map of the geographical distribution of sacred places located close to and further away from water.
- Figure 56.** The restricted soundshed zone of Njuohkarggu presented as a fuzzy viewshed. A fuzzy sound horizon indicates to what extent the phenomenon exists, not whether or not it exists. The map describes the variance from audible to inaudible. Basic map sheet © National Land Survey of Finland, licence no. 051/MML/11.
- Figure 57.** A comparison of the distribution of offered animal species according to written sources and bone material from excavations. The column depicts the sites at which the animal in question has been offered as a percentage of all excavated sites (7) or all sites mentioned in written sources (47).
- Figure 58.** Sieidis divided according to whether or not they are fish sieidis and according to their proximity to water.
- Figure 59.** A percentual comparison of the landscape types of known fish offering places in Utsjoki and Inari. One sieidi in Utsjoki belongs to two groups.
- Figure 60.** A percentual comparison of the landscape types of known fish and domesticated or wild reindeer offering places. Both fish and domesticated or wild reindeer have been offered at 14 sites.
- Figure 61.** Map of the sacred places located at most 3000 m from a hunting pit.
- Figure 62.** The landscape features related to sacred places and wild reindeer sieidis associated with hunting pits, compared percentually to the landscape features of all sacred places.
- Figure 63.** The distance of the homestead closest to a sacred place in Inari and Utsjoki.
- Figure 64.** The distance of the homestead closest to a sacred place in the entire research area.

- Figure 65.** The Lake Säytsjärvi sieidi stone and dwelling site (in the photograph: Tiina Kivioja and Tönno Jonuks).
- Figure 66.** The distance of the nearest goahti foundation remains to a sacred place in Inari and Utsjoki.
- Figure 67.** Map of the sacred places located on the borders of winter villages. The borders of the winter villages are based on Näkkäläjärvi 2000.
- Figure 68.** Published bone finds from Sámi dwelling sites in Finland (sources: Carpelan 1987; Lahti 2006; Halinen 2009; Harlin 2007b; Harlin 2009).
- Figure 69.** The chart shows how many percent of offering places at which, according to written sources, either only domesticated reindeer or both domesticated reindeer and other animals have been offered, are located in a certain landscape type.
- Figure 70.** Map of the locations of sacred places in relation to the migration routes (*geinnodat*). The routes are based on Näkkäläjärvi 2000.
- Figure 71.** The chart shows how many sacred places are located a certain distance (in metres) from the next sacred place.
- Figure 72.** Intermediate viewsheds from the sacred places around Lake Jerisjärvi. Basic map sheet © National Land Survey of Finland, licence no. 051/MML/11.
- Figure 73.** The island of Ruumissaari in Lake Pöyrisjärvi (photograph by Anssi Malinen).
- Figure 74.** Map of the sacred places located at most 3000 m from a burial site.
- Figure 75.** Kirkonkylän Ailigas [Ailigas near the church village] seen from Mantojärvi.
- Figure 76.** The prayer room on the shore of Lake Kivijärvi.
- Figure 77.** The number of euro coins of various denominations offered at various sieidis. The denomination could not be identified on all coins.
- Figure 78.** A coin in a crack of the Porviniemi sieidi stone.
- Figure 79.** Coins placed on the side of the Näkkälä sieidi.
- Figure 80.** Tealight candles placed on a flat spot on the Taatsi sieidi.
- Figure 81.** Pine cones placed in front of the Äkäsjärvi sieidi.
- Figure 82.** A stone used as a sieidi for touristic purposes.
- Figure 83.** A sieidi in the name of a holiday centre in Muonio.
- Figure 84.** A sieidi as a climbing wall.
- Figure 85.** A sieidi in a jewellery store in Hetta.
- Figure 86.** Coracoideum from the sieidi at Koskikaltiojoen suu [The mouth of the River Koskikaltiojoki].
- Figure 87.** Antlers on top of the Taatsi sieidi.
- Figure 88.** Map of the distribution of finds at the Näkkälä sieidi.
- Figure 89.** Map of the distribution of finds at the sieidi at Koskikaltiojoen suu [The mouth of the River Koskikaltiojoki].
- Figure 90.** From the Näkkälä sieidi, the view is mainly towards Näkkäläjärvi. Basic map sheet © National Land Survey of Finland, licence no. 051/MML/11.
- Figure 91.** From Koskikaltiojoen suu, the view is towards the river. Basic map sheet © National Land Survey of Finland, licence no. 051/MML/11.
- Figure 92.** The results of the phosphate analyses carried out at the Näkkälä sieidi (map by Siiri Tolonen).
- Figure 93.** A bone concentration at Sieiddakeädgi (in the photograph: Ville Hakamäki).
- Figure 94.** Map of the distribution of finds at the Sieiddakeädgi sieidi.
- Figure 95.** The results of the phosphate analyses carried out at the Sieiddakeädgi sieidi (map by Siiri Tolonen).
- Figure 96.** The life cycle of a sieidi.
- Figure 97.** Chart showing the datings of animal bone material from sieidis studied in Finland.
- Figure 98.** A Christian milieu at the sacred place of Somosen kirkko [The church of Somonen].
- Figure 99.** Map of find distribution at the Taatsi sieidi.
- Figure 100.** The locations of excavated areas at Kirkkopahta.

List of tables

- Table 1.** The definition of a sieidi in the sources depicting the region of Finland.
- Table 2.** The structure of the database.
- Table 3.** The distribution of the number of sacred places and reliability points per municipality.
- Table 4.** The amount of area covered by excavation and the number of bone fragments at the studied sieidis.
- Table 5.** Animals identified in the excavations.
- Table 6.** The number of features representing the offering places at the inspected sites (n=23).
- Table 7.** Sounds and silence mentioned in written sources.
- Table 8.** Ancient sites near sacred places. The number denotes how many sacred places are located near the type of ancient site in question. There can be several instances of the same type. Out of the locations with an excessively restricted view, six are not located within 3000 metres of ancient sites. The rectangular fireplace is recorded in the register of the National Board of Antiquities under various names.
- Table 9.** The datings of the dwelling sites containing published bone material.
- Table 10.** Reindeer round-up fences near sacred places in the Inari and Utsjoki regions.
- Table 11.** Sacred places located near churches built in the 17th and 18th centuries.
- Table 12.** Modern coins found at the studied sieidis.
- Table 13.** The distribution of species in the bone finds from Taatsi expressed in number of identified specimens (NISP) and minimum number of individuals (MNI) (Puputti 2008b).
- Table 14.** The anatomical distribution of reindeer by number of identified specimens (NISP) at Taatsi (Puputti 2008b).
- Table 15.** The distribution of species in the bone finds from Näkkälä expressed in number of identified specimens (NISP) and minimum number of individuals (MNI) (Puputti 2008c).
- Table 16.** The anatomical distribution of reindeer by number of identified specimens (NISP) at Näkkälä (Puputti 2008c).
- Table 17.** The distribution of species in the bone finds from Sieiddakeädgi expressed in number of identified specimens (NISP) and minimum number of individuals (MNI) (Puputti 2008a).
- Table 18.** The anatomical distribution of reindeer by number of identified specimens (NISP) at Sieiddakeädgi (Puputti 2008a).
- Table 19.** The distribution of species in the bone finds from Koskikaltiojoen suu [The mouth of the River Koskikaltiojoki] expressed in number of identified specimens (NISP) and minimum number of individuals (MNI) (Puputti 2010a).
- Table 20.** The anatomical distribution of reindeer by number of identified specimens (NISP) at Koskikaltiojoen suu [The mouth of the River Koskikaltiojoki] (Puputti 2010a).
- Table 21.** The anatomical distribution of capercaillie by number of identified specimens (NISP) at Koskikaltiojoen suu [The mouth of the River Koskikaltiojoki] (Puputti 2010a).
- Table 22.** The distribution of species in the bone finds from Dierpmesvárrí (Salmi 2010).
